Lucas Amoudruz

Research Associate in Computational Science and Engineering

amlucas@seas.harvard.edu
github ORCID

Education

2022 Ph.D. Mechanical Engineering - ETH Zurich
Simulation and control of artificial microswimmers in blood - Advisor: Petros Koumoutsakos

2016 MSc Computational Science and Engineering - EPFL

2013 BSc Physics - EPFL

Academic Appointments

2025 – Lecturer, Harvard University

2022 – Research Associate, Harvard University

2022 – 2023 Postdoctoral Fellow, Harvard University

Teaching Experience

Lecturer

Fall 2025 Advanced Scientific Computing: Stochastic Methods for Data Analysis, Inference and Optimization - Harvard University - Graduate course (58 students)

2018 – 2020 High Performance Computing for Science and Engineering I & II - ETH Zurich - Co-lecturer (160 students)

Teaching Assistant

2026 AI, Computing and Thinking - Harvard University

2021 – 2023 Stochastic Methods for Data Analysis, Inference and Optimization - Harvard University

2017 High Performance Computing for Science and Engineering I & II - ETH Zurich

2017 Models, Algorithms and Data: Introduction to Computing - ETH Zurich

2015 General Physics - University of Lausanne

2014 Introduction to Programming - EPFL

Academic Service and Mentoring

- Supervised 10 students for semester, Bachelor, and Master theses
- Co-organizer, *Widely Applied Math Seminar*, Harvard SEAS
- Reviewer for *Biophysical Journal*, *CMAME*, *Advanced Intelligent Systems*, *Physics of Fluids*, and others

Grant Applications

2025 SALATA: Sustainable Building and Urban Future

2025 AWS/HDSI: Physics-aware foundation models for extreme atmospheric events - $197k

2021 EuroHPC: Targeted Drug Delivery with Microswimmers - 150k node hours

2016 CHRONOS: Simulation of Microfluidics for Mechanical Cell Separation - 2M node hours

Software

- Mirheo [C++/CUDA/MPI] framework for microfluidics simulations
- Korali [C++/OpenMP/MPI] framework for large-scale Bayesian inference

Publications

Full list on my Google Scholar profile.

Talks

- *Forecasting Pyrocumulonimbus across North America with a Spatio-Temporal Deep Learning Model*, 107th AMS Annual Meeting 2027, Denver, CO, USA (upcoming)
- *Probabilistic latent effective dynamics for turbulent flow forecasting*, APS-DFD 2026, Orlando, FL, USA (upcoming)
- *Optimal Path Planning at the Microscale for Artificial Microswimmers and Cellular Manipulation*, Harvard Rising Stars in Computational Science and Engineering 2025, Cambridge, MA, USA
- *Data-driven inference of a transferable red blood cell model*, CMBE 2024, Washington, DC, USA
- *Path planning of swimmers in complex flows with reinforcement learning*, APS-DFD 2023, Washington, DC, USA
- *Hierarchical Bayesian inference for a red blood cell model*, SIAM-UQ 2022, Atlanta, USA
- *Magnetic navigation of artificial bacterial flagella in blood and water*, APS-DFD 2021, Phoenix, USA
- *Fingering instability in a Hele-Shaw cell*, PASC 2018, Basel, Switzerland
